Iranian Saffron

The Red Gold of Persia · HS Code 0910.20

10	250 g	1 kg	COA
GRADES AND TYPES	METAL TIN, NET	MINIMUM ORDER	BATCH ANALYSIS

ABOUT THE PRODUCT

Aroma, colour and flavour

Iranian saffron is internationally valued for its distinctive aroma, natural colour and flavour. Goodarzi Trading offers selected Iranian saffron that undergoes sorting and cleaning before packaging. **Super Negin**, the longest, thickest pure red stigmas, is our most requested grade by international buyers.

Product preparation

Our preparation process focuses on separating unwanted materials and improving product uniformity. Sorting may include removing yellow parts of the stigmas (Zarde), pollen and fine dust (Garde), broken stigmas, fine particles, powder and foreign materials.

Quality evaluation

Quality can be evaluated through laboratory analysis of crocin, safranal and picrocrocin, alongside moisture and other parameters. A batch-specific Certificate of Analysis (COA) can be provided for the relevant sealed batch.

The diagram shows how each grade is defined by the portion of the stigma it includes, from Super Negin (the longest pure red stigmas) to Dasteh (the whole stigma bundle).

OUR SAFFRON RANGE

Six types, ten grades

MOST REQUESTED

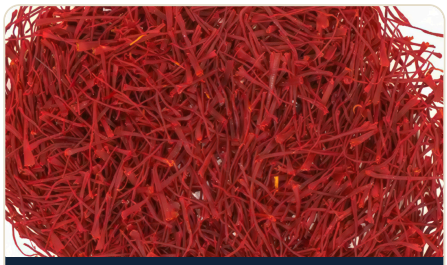

Super Negin

Highest quality · long, thick pure red stigmas

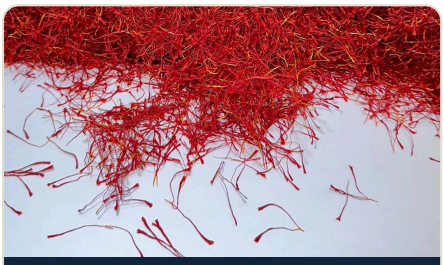

Negin

Long, red, superior quality

Sargol

Super · Qaenat
Pure red tips

Pushal

Ghalamdar Super · Ghalamdar · Regular

Dasteh

Dokhtarpich · stigmas in bundles

White Saffron

Khameh · Rishe (Konj)
pale style

GRADE	DESCRIPTION	COLORING POWER	LENGTH MM	PICROCROCIN	SAFRANAL	MOISTURE
Super Negin	Highest quality, long and thick red stigmas	230–250	20–25	≥ 70	20–50	< 12%
Negin	Long, red and superior quality	220–240	20–25	≥ 70	20–50	< 12%
Sargol Super	Pure red stigmas, no yellow parts	220–240	15–20	≥ 70	20–50	< 12%
Sargol Qaenat	Pure red stigmas, standard grade	210–230	15–20	≥ 70	20–50	< 12%
Pushal Ghalamdar Super	Red stigmas with a small yellow style portion	200–220	25–30	—	—	< 12%
Pushal Ghalamdar	Red stigmas with a yellow style portion	190–210	25–30	—	—	< 12%
Pushal Regular	Mixed red and yellow, high aroma	180–200	25–30	—	—	< 12%
Dasteh Dokhtarpich	Stigmas kept together in bundles	190–210	—	—	—	< 12%
Narmeh	Economy grade, fine stigma pieces	170–190	—	—	—	< 12%
White Saffron Rishe	Pale white-yellow style (Konj); light colour, mild aroma	—	—	—	—	—

Typical laboratory values per ISO 3632 (coloring power = E1%1cm at 440 nm). Actual values vary by harvest and batch and are confirmed in the batch-specific Certificate of Analysis.

PACKING & SUPPLY

Packing and documents

Packaging and minimum order

Packing unit	**250 g net metal tin**
Minimum order	**1 kg**
Configuration	**4 × 250 g tins per 1 kg**

Export documentation

Depending on destination and transaction requirements:

- Proforma Invoice
- Commercial Invoice
- Packing List
- Phytosanitary Certificate (where applicable)
- Certificate of Origin
- Batch-specific COA
- Air Waybill / Bill of Lading

How to order

01 Send your grade, quantity and destination

02 We confirm availability and specifications

03 You receive a commercial offer

04 Order confirmation, documents and shipment
